## Predictions in Fire Fighting - Fire Triangle

Children exploring fire

Could you put out a burning house fire by putting a huge bell over it?

Why do firefighters not use very big fire-blankets to extinguish forest fires?

I loved to wear the safety goggles and the labcoats - I felt like a real scientist.

I loved guessing how all the different materials I collected would burn.

I would have never expected so few lycopodium spores to make such a big fire.

easy-to-implement, exciting experiments with everyday objects - surprising results

# SELECT THE APPROPRIATE TEMPLATE

Full Name | School | City | Country Calibri 31 pt

## Project Title Calibri 70 pt

Subtitle if necessary Calibri 35 pt

This is the project description. The text is set in 31 points. This might seem large but you have to consider, that the distance between the reader and the poster might be quite big, so a large typeface is essential for readability. Also you should not overestimate the average reading time of a poster.

A clear structure also helps the reader to quickly understand, what your poster is about so highlighting facts with a bold typeface and colour might be useful.

Please stick to your Guiding Theme's color scheme, f.e. for title or subtitle. Colors are intentionally selected and fixed. Color codes for each Guiding Theme are listed below.
