

# SUSTAINABLE DEVELOPMENT GOALS IN EDUCATION

Janet Prokešová, Aleš Pilgr | VIDA! science center | Brno | Czech Republic

## Ice over gold: science show

Drinking water is one of the essentials for the life of humans. How does it appear in our living spaces, and how does it go away?

One of the recent issues is the growing lack of drinking water on the planet Earth. Why is this phenomenon happening?

How is it related to snow, ice and glaciers?  
Is there anything we can do about it?

Of course, we can!

### What is VIDA!?

Near the Brno trade fair complex, playful explorers of all ages will find more than one hundred and eighty interactive exhibits over an area of nearly 6200 square meters that will give them a better understanding of the world around us.

### What do we offer to our visitors?

- our unique exhibition which has four thematic sections: *Planet, Civilisation, Human and Microworld.*
- *3D films* – each of our 3D films has a fourth dimension – a hefty supply of interesting facts!
- *DIY workshop* – get your hands dirty in in our creative space!
- *VIDArd Fortress* – a treasure hunt game full of tasks
- *Science Shows* – performances filled with fun experiments
- *VIDA! After Dark* – the exhibition comes alive with music and an open bar
- *Labworkshops for families*
- Kurt Gödel Code Journey – in the footsteps of Brno's little-known genius, unique adventure full of logical ciphers, tasks, hidden pathways and corners.
