

SUSTAINABLE DEVELOPMENT GOALS IN EDUCATION

François Bonny | Middle school Jean l'Herminier | La Seyne-sur-Mer | France

Reduce the digital divide

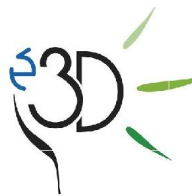

By recycling used computer

With all the digital work requested by teachers, **it is extremely penalizing today for our students not to access a computer at home, it will be worse tomorrow.**

Our circular economy project enables the delivery of **5,000 computers** to students in the South of France region.

We collect used computers from middle and high schools and screens from large companies such as la SNCF.

Computers are repaired and rebuilt under Linux in a hundred of workshops.

Our Linux
